

Template Guide:

- 1. The dotted boxes represent where the handles are stitched inside of each bag
- 2. Keep text at least 1” from the edge of each panel
- 3. If the Background color on the front/back is different than the color on the bottom of the bag, bleed the background color from the front/back by 1/4". This will avoid the color on the on the bottom of the bags from being visible
- 4. Critical artwork such as text should not go through the stitch line.
